Paint your best picture in the analog world

Picture this — flip on your laptop, zap your fax, or check out the hottest CD-ROM titles on your multimedia center, and you're putting Micro Linear to work! From computers and advanced networking, to televisions, stereo equipment, measuring equipment and telecom technology, virtually all electronic media depends on analog devices for A/D conversion. And Micro Linear people are *The Artisans of Analog*, creating a distinct niche in this generation's most exciting technology.

As a newly hired grad, you will experience a compelling, rewarding challenge from the start. Guided by our dynamic mentoring program, you will be designing right away. Not a bad beginning for an emerging artist. The leading OEMs in the world depend on Micro Linear and our far-reaching family of analog devices for truly inspired solutions. Pursue your craft at Micro Linear. And make an impact the world will notice!

ANALOG DESIGN ENGINEERS
If you are graduating with an MSEE/PhD, this position will provide the opportunity to learn advanced IC design while developing systems engineering skills. Design Engineers will also have the chance to work in Bipolar, CMOS and BiCMOS process technologies. You will design and develop analog and mixed signal ICs. This includes chip definition, circuit design, simulation, layout supervision, debug, characterization and release to production.

TEST DEVELOPMENT ENGINEERS
If you are graduating with a BS/MSEE and have a preference toward analog circuits, our Test Development Engineering opportunities may be your ticket. Strong analog skills are necessary so you can design automatic test equipment software and hardware that performs complex electrical screening of our ICs, as well as insure this testing correlates to laboratory benchmarks.

PRODUCT ENGINEERS
If you are graduating with a BS/MSEE and have a preference for analog circuits, our Product Engineering positions may be of interest to you. Strong analog skills are integral, as you will evaluate, characterize and introduce new products to manufacturing. You will also be responsible for analyzing, enhancing and forecasting Wafer Sort and Final Test yields and supporting production to resolve product issues.
