

BUSH

Continued from Page 1

Deere said the students chosen for the graduate classes represent leadership potential.

"These students will develop leadership skills to be used for public service," Deere said. "(President) Bush sets an example for these students."

One of the graduate students in the charter class is Jesse Czelusta, former Residence Hall Association president. Czelusta said as an undergraduate student he focused on economics, but now his focus will be the interaction of the public and private sectors.

Czelusta said he hopes the graduate school develops a stronger intellectual community at Texas A&M.

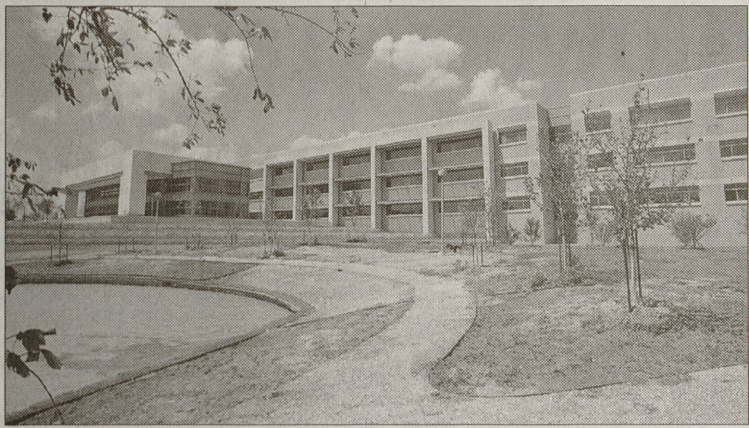

"I'm humbled to be a part of this group," Czelusta said. "I think I will learn as much from them as I will in actual classes."

Czelusta said meeting former President Bush and his family will be an honor.

"It's a neat opportunity," Czelusta said. "His experience is something we can all learn from."

Deere said graduate classes will be taught by a group of five professors from the departments of Economics and Political Science.

Deere said former President Bush will not officially teach seminar courses, but plans to be interactive in the school. He said the former

The George Bush School of Government and Public Services opens today.

president and his former administration may make special appearances to lecture.

The dedication of the school to former President Bush will be September 9-10.

A conference begins Tuesday, with former Secretary of Defense Dick Cheney and retired U.S. Sen. Paul Simon discussing different dimensions of the effects of force after the Cold War. Cheney and Simon will be joined by other scholars from various universities.

Former President Bush, his wife, Barbara, and his son Gov. George W. Bush will arrive Wednesday for the dedication of the school of government. The 2:30 p.m. ceremony will conclude the dedication.

A concert follows the dedication featuring Bush's friend Lyle

Lovett and the Austin Symphony Orchestra Pops.

Classes offered are BUSH 601-Leadership and Public Administration, BUSH 611-Public Policy Formation, BUSH 621-Economics Analysis and BUSH 631-Quantitative Method Public Management I.

Classes for undergraduate students will also be taught in the school of government. The Departments of Political Science and Economics will hold a few classes for the larger size introductory classes.

Deere said he expects the school to grow in the next few years because interest in public administration is increasing.

"We expect the school to grow to include 80 to 100 graduate students in four or five years," Deere said.

ARCH

Continued from Page 1

Guy Cooke, assistant

manager of the facilities construction division of Facilities Planning and Construction, said the driveway and most of the work on the garage, such as wiring, was completed this summer.

Cooke said construction that would require using Lubbock was done in summer because there

is less pedestrian and motorist traffic in the summer.

"The only realistic time to shut down roads is during the summer months," Cooke said. "If we waited

until fall or spring, people coming from the Commons would have to jump

over ditches."

Williams said the funding for the archway was included in the library parking garage funding.

Williams said the garage should have 640 spaces, and about 300 to 350 spaces will be available for staff and faculty parking contracts. The other 250 to 300 spaces will be available to visitors. He said students will not be able to buy parking contracts for this garage.

Williams said there will be a cashier in the garage and "pay on foot" equipment under the archway.

Weldon Barber, a senior marketing major, said at first he thought the archway was some type of toll booth, and students would have to pay to drive down

Lubbock Street.

He said he understands why the University would want to block Lubbock Street to protect pedestrians, but blocking the road from thru-traffic will cause traffic problems in other areas.

"The way traffic flow is now traffic can't go through Southside," Barber said. "You have to go around. I think this will congest Bizzell."

Alice Gonzalez, speaker of the Student Senate and a junior agricultural development major, said the first time the present Student Government heard about closing Lubbock Street to thru-traffic

was this summer when the PTT's advisory committee presented construction plans to the Executive Council of student government.

She said she was aware of student input on the project in the form of a survey conducted about four years ago.

Gonzalez said if she did not know the details of the plan to close Lubbock Street she would disagree with the plan because of the heavy flow of traffic in the area.

"But in terms of future planning and closing many on-campus streets to traffic, I don't think that is a bad thing," Gonzalez said.

The Coke Street entrance to Lubbock is blocked by a gate. Williams said faculty and staff will be able to use this entrance to get to the faculty and staff parking lots in this area.

Computing Toolbox

Computing news at Texas A&M—brought to you by Computing and Information Services (CIS)

CIS Produces "One-Stop" Source for Information on Student Computing

Do you ever wish you could find information about student computing in a central, easy-to-use source? Now you can!

CIS has produced the Student Computing Information Page (SCIP), an indexed and searchable Web site that contains important and frequently requested information on a variety of issues relevant to student computing. A few examples include: news about computing at Texas A&M, how to get connected to the Internet from your apartment or dorm, CLAIM—a program that allows you to claim and manage your computer accounts on such systems as unix.tamu.edu, answers to Frequently Asked Questions (FAQs) from students such as "How do I get e-mail?", and helpful documentation for microcomputing applications, UNIX, Open VMS, and MVS.

SCIP may be accessed at <http://www.tamu.edu/scip>

Use of Computers in Open-Access Labs Now Requires Labs Login-ID

If you plan to use the computers in the Open-Access Labs, you'll be required to set up a Labs Login-ID and password. Once you set up your Login-ID and password, you'll receive up to 3 megabytes of home directory disk space on which to store your files.

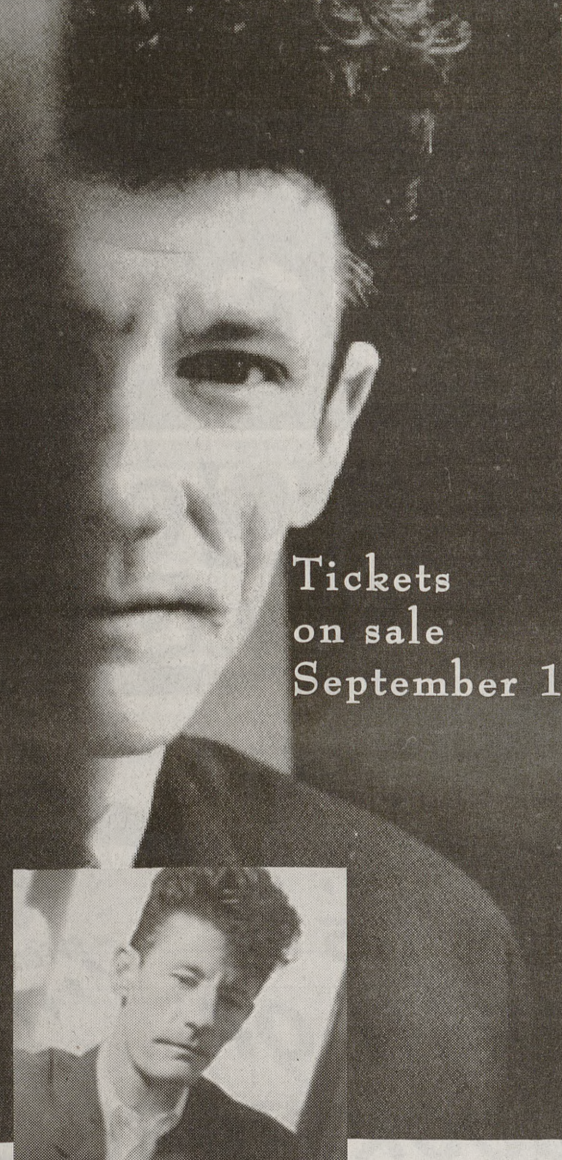

- If you're a new student, you can set up your Labs Login-ID and password through CLAIM, a program that allows you to claim and manage your computer accounts on CIS systems. CLAIM is available at claim.tamu.edu or from all the computers in the Open-Access Labs in the following locations: 106 Biochemistry/Biophysics Building, 150 Read Building, 133 John R. Blocker Building, 021 Wisenbaker Engineering Research Center, 1002 Teague Building, and 137 West Campus Library.
- If you're a returning student who had accounts set up through CLAIM, you've already received a Labs account (with the password being the same as your CLAIM password).
- If you've forgotten your CLAIM password and need to reset it, please bring a valid student ID to any CIS Open Access Lab or to the Network Availability Center in the Teague Building. Please note that once you change your CLAIM password, you'll also have to change your Labs Login password through CLAIM.

If you have any questions about computing at Texas A&M, please call Help Desk Central at 845-8300, view: www.tamu.edu/scip, or send e-mail to helpdesk@tamu.edu.

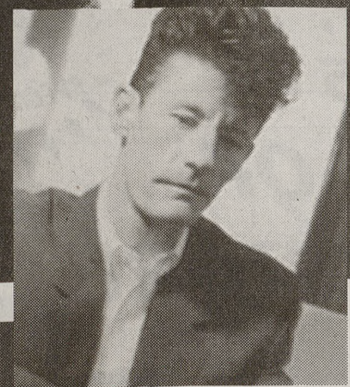

Celebrate Lyle style.

A dedication celebration featuring Lyle Lovett & The Austin Symphony

Don't miss Lyle Lovett! Mark September 1st on your calendar as the day tickets will go on sale for a one-night only concert event featuring The Austin Symphony and Lyle Lovett. A dedication celebration, this musical occasion is presented by the George Bush School of Government and Public Service, College of Liberal Arts, Texas A&M University.

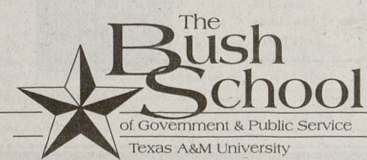

Tickets on sale September 1

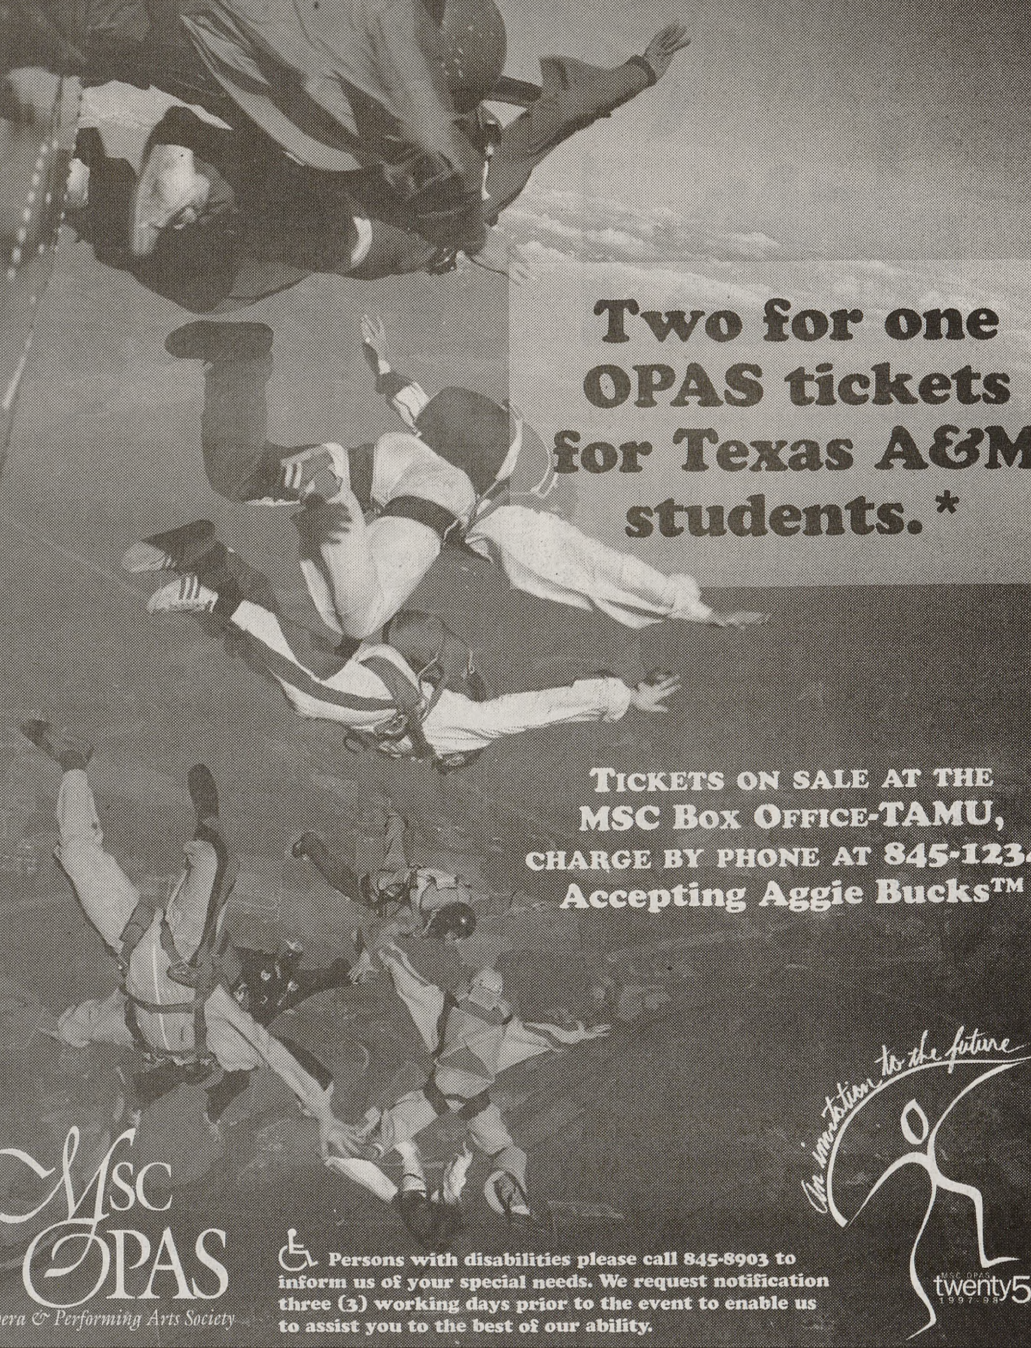

Lyle Lovett

Rudder Auditorium
Wednesday, September 10
at 7:30 PM.
Tickets go on sale
September 1 at 10:00 AM.
Call the MSC Box Office
at 845-1234.

AGGIES DO IT BEST IN PAIRS.

Two for one OPAS tickets for Texas A&M students.*

TICKETS ON SALE AT THE MSC BOX OFFICE-TAMU, CHARGE BY PHONE AT 845-1234. Accepting Aggie Bucks™

Persons with disabilities please call 845-8903 to inform us of your special needs. We request notification three (3) working days prior to the event to enable us to assist you to the best of our ability.
