"QUOTE OF THE DAY"

This Week's Theme: If you had to change something about Texas A&M, what would it be and why?

"The parking. We have a world-class University; too bad we can't park on it."

— Jason Cavender
Senior industrial distribution major

COMICS

Continued from Page 3

Some people said the "bad girl" books are not aimed at women, men. "Some people tend to think because the main characters are men, that is who the book is read at," Jones said. "But the women in these books are generously proportioned and wear skimpy clothes and are generally drawn and written for a male audience."

Some newer books, like *Strangers in Paradise*, have characters who are normal people who lead everyday lives. These books are bringing new fans to comic books. Colon said he recently started to take interest in these slice-of-life books. "I enjoy books like *Strangers in Paradise*, because it is different from your usual comic book," he said. Jones said he thinks Superman will enjoy some attention this year from readers due the

character's 60th anniversary. "It is a big event that is coming up, with all the deaths and costume changes he has gone through recently," Jones said. "I expect it to attract interest." The most lasting effect seems to be reader loyalty. Jones said it is the ease of the comic book that insures such a following. "They're easy to pick up on a short break and start reading," Jones said. "It is like a soap opera; people just get pulled into the book's world."

Come Visit with the Women of
Alpha Phi, a Social Sorority
Informal Rush Schedule

Today's Rockwell Automation

Tomorrow's technology is something that frames all our thinking at today's Rockwell Automation. Because if you only focus on today's technology, you'll end up totally out of the competitive picture a few years from now.

Zoom in on us. We're looking for the visionaries, dreamers and non-stop creative thinkers who are changing the way the world controls things - from roller coasters and Broadway shows to pharmaceutical production and food processing. Join the people of today's Rockwell and get a close-up view of tomorrow. We will be on campus on:

See Rockwell Automation at: Texas A&M University
On-Campus Presentation: February 12, 1998
On-Campus Interview: February 13, 1998
Check your placement office for locations.
