Bryan was the first female to receive a degree. Her husband never completed his A&M degree.

She was able to attend under an exception that allowed relatives of professors to go to A&M. (Her brother taught engineering.)
The first female to enter A&M

after the 1963 decision was Stella Haupt, a 56-year-old grandmother.

In a 1983 article on the anniversary commemorating the admission of women to the University, Christine Emile Cleveland, Class of '83 and executive vice-

president of student government in 1982 and 1983, who planned to attend Harvard Law School that fall, said "she might have wanted to run for student body president, but A&M is not ready for that."

Women have made great strides at Texas A&M since 1963.

Brooke Leslie, Class of '95 and Laurie Nickel, Class of '98, proved that A&M is ready.

"In the past men may have dominated. As a student coming in in 1994, it was not even an issue," Nickel said.

The Corps of Cadets has also made advances in the acceptance and integration of women.

The deputy Corps commander, the second-highest ranking member of the Corps staff, is Kelly Garrity, a senior journalism major.

"Every time we've changed, it's been something good for the Corps," she said. "A lot of cadets adapt well to change, and I think through the years, many more outfits have become integrated."

"Now it's more the attitude of 'if you work hard enough, you will make it.' There are so many opportunities in the Corps and the University. If you put your heart in it, you're going to become a leader."

Nickel said she sees women at A&M on a level playing field as well.

"It has everything to do with qualifications," she said. "It's the result of how our generation views it. If we love our institution or organization, we want the best person for the leadership role."

Sherry Yennello, president of the Women's Faculty Network and an associate professor of chemistry, said she also recognizes the progress made at A&M.

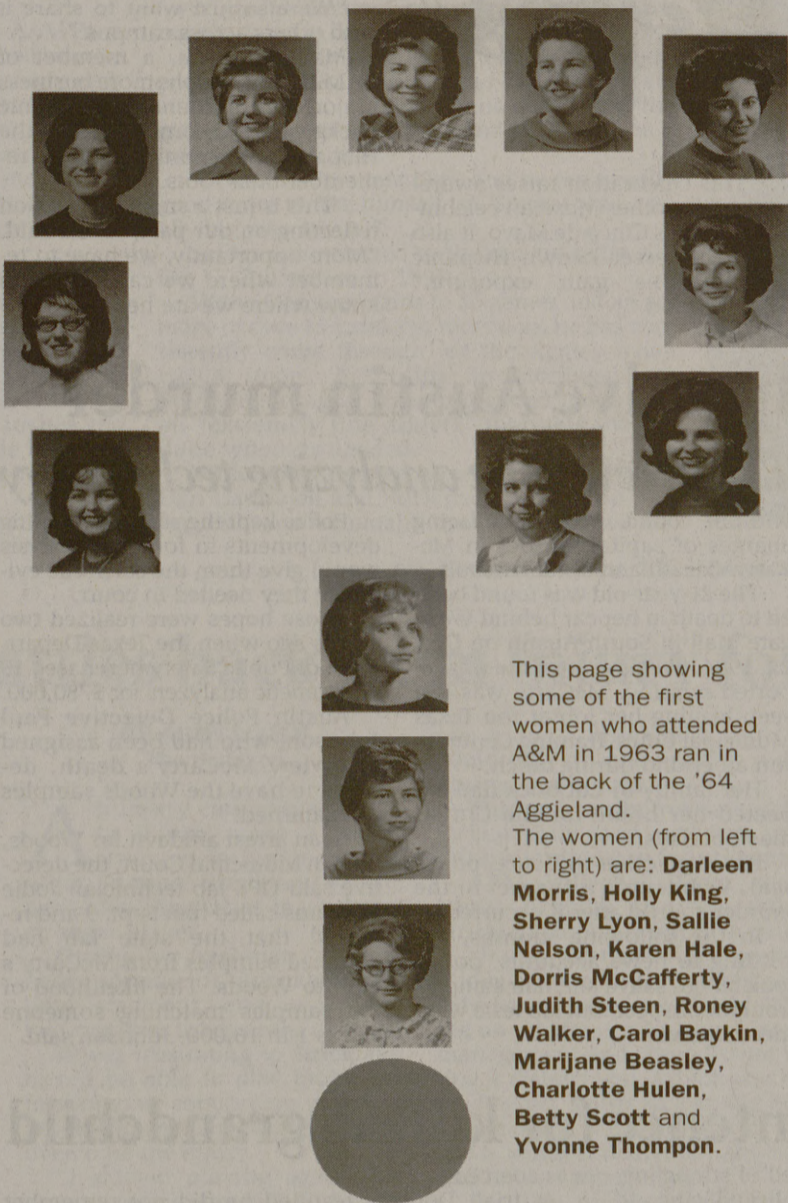

"A&M has come a long way with respect to women. It was a few years back that for the first time, the number of female students equaled the number of male students," she said.

"There are still opportunities to make those kind of numbers in terms of faculty."

A&M is making strides in hiring assistant professors, but it will take longer to get that parity in faculty."

The role of women at A&M is best exemplified by their growing enrollment. In 1963, 150 were admitted; today women make up almost half of the student population.

UNDERGRADUATE COEDS

This page showing some of the first women who attended A&M in 1963 ran in the back of the '64 Aggieland. The women (from left to right) are: **Darleen Morris, Holly King, Sherry Lyon, Sallie Nelson, Karen Hale, Dorris McCafferty, Judith Steen, Roney Walker, Carol Baykin, Marijane Beasley, Charlotte Hulen, Betty Scott and Yvonne Thompon.**

The Ladies of Kappa Kappa Gamma

Would like to congratulate all of the fraternities on a very successful Aggie Fall Rush!
