Wipeout 3
Genre: Racing
Developer: Psygnosis
Playstation

Wipeout has always been a fun Playstation series and the newest title does not disappoint — too much.

The biggest drawback of *Wipeout* is the lack of available tracks to race. There are only four main tracks and secret extra tracks must be found. The tracks in *Wipeout 3* are better than those in the previous two titles of the series. Some are dark and confusing and others integrate vertical elements into the courses well.

It is easier to crash against the walls in this version than in *Wipeout XL*, and this new version does have a split screen two-player option, excellent visual design and a killer soundtrack. There is also an elimination game which is a battle royale between racers.

Wipeout 3 still delivers fast and fun futuristic sled racing that is miles ahead of the competition. But because of the limited number of tracks available to the player at the beginning of the game, this one is more of a renter than a keeper. (Grade: B-)

Thousand Arms
Genre: RPG/Dating
Simulation
Developer: Atlus
Playstation

Thousand Arms must be one of the most interesting video game concepts ever released. The game revolves around a stereotypical RPG engine with a twist — a major part of the game is becoming a gigolo.

The main character, Meis, is a sex-starved warrior and blacksmith who hits on any female in sight. In order to create a more powerful sword to fight enemies with, Meis must "forge" better weapons by using the females found in the game. A female who finds Meis adorable will forge a better weapon for him to use against the various monsters in the game.

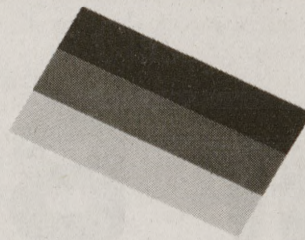

In order to get the female to like Meis, he must date them, buy them presents and put up with all their nagging, just like real life dating situations. The pseudo-dates take place at designated "date spots" where Meis and the female engage in conversation, which in relationship terms means listening to the female ramble on and selecting the correct response from a predetermined list of approved phrases.
