The truth is out there
Committee presents lecture on UFO

BY JULIA RECINDUS
The Battalion

For years there have been whispers of other life forms visiting the planet Earth, unidentified flying objects (UFOs) hovering in the night sky and government cover-ups.

Now those whispers have risen to outspoken voices who, in the words of the "X-Files," know that "the truth is out there."

The MSC Current Issues Awareness Committee will provide a forum for one of these voices when it hosts the lecture "UFOs: The Hidden Story," a dream come true for science-fiction fanatics, conspiracy theorists and members of the general public whose seek to satisfy their curiosity on the subject.

Robert Hastings, a laboratory analyst for a semiconductor manufacturer in Albuquerque, N.M., has been researching the subject of UFOs since 1967 and will be conducting the lecture. Hastings said he became intrigued by the phenomenon after witnessing a number of objects on radar for several minutes at an air traffic control tower at Malmstrom Air Force Base near Great Falls, Mont.

Speaking about his experience in a press release, he said, "Five UFOs were tracked on radar for several minutes, and jets were launched to attempt an intercept

of them. I later learned from Air Force sources that as the jets closed in, the UFOs performed a vertical ascent and left the area at an enormous speed far beyond the capability of any conventional aircraft."

He said in 1994 he was present for another sighting.

"I witnessed something, an object, in the sky in Albuquerque where I live. I took it for a satellite, but it did a U-turn in the sky in literally two seconds. That could not have been a satellite; a satellite does not do a U-turn or go that fast," he said.

He has traveled across the United States and lectured at more than 500 colleges and universities.

At these presentations, he discusses previously classified documents, made available under the Freedom of Information Act (FOIA) to the public, as well as sightings. He also presents a slide show that reviews government cover-ups that

have occurred over the past 50 years. Hastings combines his research with others who have military backgrounds and who have been involved in classified operations. He has interviewed military personnel and Hastings said he believes one of the reasons the government is so secretive about the existence of UFOs is because of the high concentration of sightings near major clear weapons sites.

Many of his sources have reported malfunctions of nuclear equipment. A number of the documents now available contain information about UFOs frequenting highly sensitive airports at these sites, including a laboratory of U.S. nuclear weapons are designed to mention sightings of the flying objects hovering above nuclear missile launchers or nuclear bomb storage bunkers.

See UFOs on page 10.
