'Equilibrium'

Christian Bale, Sean Bean star in off-balance sci-fi

KRT CAMPUS - Kurt Wimmer claims directing and writing credits for the new sci-fi thriller *Equilibrium*. The fraud. The real writers were George Orwell, Ray Bradbury, Margaret Atwood and the Wachowskis, the guys who cooked up the martial arts-meets-sci-fi thriller, *The Matrix*. *Equilibrium* is a semi-cool, semi-cut-rate Minority Report, last summer's Steven Spielberg film of a Philip K. Dick story that was, in turn, a riff on Bradbury's *Fahrenheit 451*. Which is a long way of saying that *Equilibrium* is another movie about a law enforcement officer in a future, fascist society who discovers that what he's doing is immoral.

Christian Bale is Cleric John Preston, a Judge Dredd sort of enforcer in a world that has - after World War III - decided that human emotions are the cause of all its ills. Cleric Preston hunts down rebels who are guilty of "sense crimes." He's on his guard for anyone who displays any emotion or sense of aesthetics. When his partner (Sean Bean) cribs a book of poetry by W.B. Yeats at a raid, you know the guy's toast. Literally. Those who feel are incinerated, all on the orders of "Father," the Big Brother who calls the legions of lemmings to their version of daily ritualized prayers - their daily doses of Prozum, the drug that keeps everyone zonked and unemotional. Preston misses a dose, and then there's the one arrest that makes him question his actions - she's played by the puppy-eyed Emily Watson.

Christian Bale stars as Cleric John Preston, a law enforcer ending the world of human emotion, in this weekend's *Equilibrium*.

Before you know it, he's saving Emily Watson from slaughter and resolving to find a way to stop the drugs so that no one will love Big Brother - sorry, Father. Silly stuff, all mixed up together like a term paper from a kid who can't quite distinguish one sci-fi work from another. Bale, the years are showing us, is as aptly-named as Vin Diesel. His baleful glower is perfect for a man who is drugged into no longer feeling, and trained, ninja-fashion, to use his body and his guns to maximum effect. Bale has also become the most absurdly buff celebrity this side of Barry Bonds. Wimmer manages to sneak several scenes of genuine emotion into all this plot and production design. And the action bits go into full *Matrix* overdrive, with Bale an able warrior to carry out the moves, leaps and precision gun and swordplay that the role calls for. The first of these, in a darkened room illuminated only by gun-muzzle flashes, is the most dazzling. If you ignore the 500 or so gun and sword deaths and make a game of the many plots stolen for this and can lust after the cool black-on-black clothes while laughing at the not-so-futuristic cars and buildings, you're going to enjoy *Equilibrium*. If you can't do that, wait for *Minority Report* on video.
