Depo-Provera is 99.7% effective.
Birth control you think
about just 4 x a year.

Of course, using condoms is the only way to protect yourself against HIV/AIDS or other sexually transmitted diseases, but make sure you're also as protected as possible against pregnancy. That's why more women than ever are choosing *Depo-Provera* — it's 99.7% effective when administered on time every 3 months.

Remember, *Depo-Provera* doesn't protect you from HIV/AIDS or other sexually transmitted diseases.

Some women using *Depo-Provera* experience side effects. The most common are irregular

periods or spotting. Many women stop having periods altogether after a few months and some may experience a slight weight gain. You shouldn't use *Depo-Provera* if you could be pregnant, if you have had any unexplained periods, or if you have a history of breast cancer, blood clots, stroke, or liver disease. When using *Depo-Provera*, there may be a possible decrease in bone density.

Depo-Provera. One of the best and most convenient ways to protect yourself from pregnancy. Ask your health care professional if prescription *Depo-Provera* is right for you.

See what *Depo-Provera* is all about.
