If you accidentally  
got pregnant,  
could you  
still make it  
to graduation?

Depo-Provera is 99.7% effective  
in preventing unintended pregnancies.

If you're not ready, you're not ready. That's why more women than ever choose *Depo-Provera*. You need just 1 shot every 11 to 13 weeks to protect you from pregnancy. So, you can focus on history, not maternity.

*Depo-Provera* does not protect you from HIV/AIDS or other sexually transmitted diseases.

You shouldn't use *Depo-Provera* if you could be pregnant or if you have had any unexplained periods. You should not use it if you have a history of breast cancer, blood clots, stroke, or liver disease. When using *Depo-Provera*, there may be a loss of some of the bone mineral stored in your bones. This could increase your risk of developing bone fractures.

Some women using *Depo-Provera* have side effects. The most common are irregular periods or spotting. Many women stop having periods altogether after a few months. You may gain weight when using *Depo-Provera*. About two thirds of the women in clinical trials reported a weight gain of about 5 lb during the first year of use.

If you're not ready to get pregnant, be ready with effective birth control. Talk to your health care provider to see if prescription *Depo-Provera* is right for you.

See what *Depo-Provera* is all about.  
Call toll free 1-866-519-DEPO or visit  
[www.depo-provera.com](http://www.depo-provera.com).

**Depo-Provera<sup>®</sup>**  
Contraceptive Injection  
medroxyprogesterone acetate injectable suspension

Birth control you think about just 4 x a year.
