NEW HAVEN, Conn.

"If Yalies were going to vote

When Kerry graduated in 1966 with a degree in political science, opposition to the Vietnam War was building. Yale still required students to wear jackets and ties at dinner, and no female undergraduates were admitted.

By the time Bush earned a degree in history in 1968, Yale was simmering with activism against the war and in favor of labor unions and other causes. Dinner jackets were gone, and female undergraduates arrived the following year.

Both men were chosen to join Yale's top secret society Skull and Bones. Each year, 15 seniors are tapped for the 172year-old club, which owns a windowless crypt on campus and a private island in the St. Lawrence River.

The experiences and influence of Bonesmen, as members are known, have reached mythic proportions. Their rites and membership are supposed to be secret, although initiations reportedly include lying in a coffin and confessing personal sexual secrets.

## Candidates cross paths at Yale

At Yale University in the 1960s, President Bush was a bom Yale and Sen. John Kerry was a jock and political junkie. Both were members of the secretive club - Skull and Bones.
