University Undergraduate Research Fellows

The Office of Honors Programs and Academic Scholarships is proud to recognize the following students who have named 2004-2005 Research Fellows:

J. Stephen Addcox <i>English</i>	Jason Eichorst <i>Political Science</i>	Desiree Ledet <i>International Studies</i>
Andrea Rae Allen <i>International Studies</i>	Justin Flint <i>History</i>	Austin Lee <i>Biology</i>
Erin Barth <i>Genetics</i>	Erin Ashley-Webb Frazier <i>Agricultural Economics</i>	Jacky Tzu-Hao Lee <i>Information & Operations Management</i>
Nathan Blalock <i>Anthropology</i>	Michelle Garst <i>Biomedical Engineering</i>	Julia Leslie <i>Biomedical Engineering</i>
Aaron Bray <i>Mechanical Engineering</i>	Richard Graff <i>Electrical Engineering</i>	Elizabeth Machol <i>History</i>
Zachry Brown <i>International Studies</i>	Kristin Graham <i>English</i>	Katherine McQuade <i>Biochemistry</i>
Jennifer Chancellor <i>English</i>	David Gras <i>Management</i>	Huy Nguyen <i>Biomedical Sciences</i>
Matthew Coles <i>Philosophy</i>	James Griffin <i>Computer Engineering</i>	Travis Owens <i>Mechanical Engineering</i>
Becky Corbin <i>Communication</i>	Christopher Gruber <i>Philosophy</i>	Stephen Pierce <i>Political Science</i>
Carla Crapster <i>English</i>	Katherine Guenther <i>Psychology</i>	Lindsay Riddle <i>Biology</i>
Nathan Davis <i>Electrical Engineering</i>	Heng Guo <i>Electrical Engineering</i>	Amy Sattler <i>Psychology</i>
Brandon Duke <i>History</i>	Stephen Hanssen <i>Computer Engineering</i>	Gordon Sauer, III <i>English</i>
Timothy Duryea <i>Electrical Engineering</i>	Brian Janak <i>Civil Engineering</i>	Troy King Son <i>Biology</i>
Jagadeesh Dyaberi <i>Computer Engineering</i>	Kenneth Johnson <i>Environmental Design</i>	Justin Steffy <i>Computer Science</i>
Josh Eberle <i>Finance</i>	Julie Jones <i>Aerospace Engineering</i>	Jordan Terasaki <i>Biology</i>
	Ekaterina Karamysheva <i>Finance</i>	Mustafa Tongarlak <i>Industrial Engineering</i>
	Megan Lambert <i>Biology</i>	Luke Wagner <i>Computer Science</i>

The I-10 bridge near Pensacola is destroyed by Hurricane Ivan. More than 2 million residents along a 300-mile stretch of the Gulf Coast cleared out as Ivan, a former 165-mph monster that killed 70 people in the Caribbean, closed in on an unsteady path. The storm was blamed at least 20 U.S. deaths, most of them in Florida.

Storm-weary Florida bears brunt of Hurricane Ivan

By Pauline Arrillaga
THE ASSOCIATED PRESS

PENSACOLA, Fla. — Hurricane Ivan drilled the Gulf Coast on Thursday with 130-mph winds that inflicted far less damage than feared everywhere except Florida's Panhandle, where residents were left with surge-ravaged beach fronts, flooded streets and homes ripped apart by deadly tornadoes.

"We were prepared for the hurricane, but the tornadoes were bam, bam, bam," said Glenda Nichols, manager of the Microtel Inn in Marianna, Fla. "There was nothing we could do about it. I put all my guests in their rooms and told them to get in the bathtubs."

Ivan quickly deteriorated to a tropical storm after coming ashore. But forecasters warned it was not done yet: It threatened up to 15 inches of rain and flooding across the South, already soggy after Hurricanes Charley and Frances over the past month.

And more danger could be on the horizon: Tropical Storm Jeanne is tearing through the Caribbean on a path that could take it into Florida early next week as a hurricane.

Ivan spun off at least a dozen tornadoes in Florida, while creating a storm surge of 10 to 16 feet, topped by large battering waves. A portion of a bridge on Interstate 10, the major east-west highway through the Panhandle, was washed away.

The death toll included 13 in Florida, two in Mississippi, and one in Georgia. In Louisiana, four evacuees died after being taken from their storm-threatened homes to safer parts of the state.

Many of the millions of Gulf Coast residents who spent a frightening night in shelters and boarded-up homes emerged to find Ivan was not the catastrophe many feared.

New Orleans, especially vulnerable to storms because much of it lies below sea level, got only some blustery winds, a mere two-tenths of an inch of rain and only some downed tree limbs. By Thursday morning, French Quarter tourists came out of their hotels to sip cafe au lait under brilliant sunshine.

"I know I'm going to hear from the Monday morning quarterbacks," said New Orleans Mayor Ray Nagin, who had urged the metropolitan area's 1.2 million residents to flee three days ahead of the storm. But he added: "Look at the scenes from Mobile and Pensacola — that could have been us."

Ivan's surf pounded Alabama beach front resorts for hours, leaving condominium towers standing in a lake of floodwaters, at least one five-story building crumbling in sand and sending some island homes into the Gulf of Mexico. An initial damage assessment in Gulf Shores found gutted shops, buckled concrete parking lots, and beach front roads deep in sand.

"The rain was going sideways. You could hear metal bending. It was just bad. It was my first one and there won't be a second," said Deb Harwick, who rode out the storm in a motel near Gulf Shores Beach.

Hundreds of thousands of people were without power, including 90 percent of Gulf Shores Co.'s customers in Florida.

"It's catastrophic. The electric system it has taken us 80 years to build was basically destroyed in eight hours," said spokesman for Hutchinson, adding that it could take three weeks to restore power.

Dennis Mace, a construction worker and tree trimmer, was ready to begin helping with cleanup. "Business is good. People are just sick of it," he said.

Mace added that he had seen signs on a house that summed up people's troubles: "1 Charley, 2 Frances, 3 Ivan, 4 Sale."

In the Panhandle, destruction was seemingly around every corner. Huge magnolia trees had fallen across the streets, and the trunk of a 25-foot palm had snapped about eight feet off the ground. Bricks from St. Paul's United Methodist Church in Pensacola lay in heaps beside the building.

Traffic lights lay shattered on the road. Telephone poles leaned over at precipitous angles, wires sagging to the ground just feet above it.

Liz Robinson sat on the porch near where her house once stood. Her eyes rimmed with tears, her home was flattened when the roof came crashing down.

"That was my house," she said, pointing at a pile of unrecognizable debris. "I just want pictures, my mementos."

"It's over," she said, her voice breaking. She walked away without another word — wiping tears from her eyes.
